BACK MATTER

About the Author 29

Before You Begin

How this book works. There are 100 prompts, in ten categories of ten. Each one is a complete request you can copy, paste into Meta AI and use straight away. Paste into meta.ai, send to @Meta AI in WhatsApp, or message Meta AI in an Instagram or Facebook chat. Then save the answers you like to Favourites.

These prompts are personal. They were written for Zirlandia Milkovic's own business, so many mention her name, her handle (@madesimple_ai), her village (Ravna Gora, Croatia), her e-book and its price. Before you use a prompt, swap those details for yours. The *Your Details* page makes this a one-minute job.

Check before you publish. Meta AI can be wrong, and it can invent facts, numbers and sources. Read every answer, verify anything you plan to publish or send, and test any code. Several prompts ask you to attach audio, screenshots, contracts or client messages. That material goes to an AI service, so remove personal details or get permission first.

About Meta. This book is independent. It is not written, sponsored or endorsed by Meta Platforms, Inc. Meta AI, Muse, WhatsApp, Instagram and Facebook are trademarks of their owners. Apps and features change often, so a prompt may need a small adjustment to match what you see on screen.

The CTFET Formula

Every prompt in this book follows the same five-part pattern. Learn it once and you can write your own.

Letter	Part	What it does
C	Context	Tells the AI who it is and who you are talking to.
T	Task	Says exactly what you want done.
F	Format	Sets the shape of the answer: bullets, table, script, code, number of items.
E	Example	Anchors the answer in something real, such as a place, a product or a situation.
T	Tone	Sets the voice: friendly, didactic, urgent, professional.

Worked example

Take Prompt 1: "*Act as Meta AI expert. Explain what Llama 4 is to a 60-year-old beginner in 5 simple bullets, no jargon, with example from Ravna Gora Croatia. Tone didactic fun.*"

- **Context:** act as a Meta AI expert; the reader is a 60-year-old beginner.
- **Task:** explain what Llama 4 is.
- **Format:** five simple bullets, no jargon.
- **Example:** use a scene from Ravna Gora, Croatia.
- **Tone:** didactic and fun.

When an answer is not right

Do not start again. Reply to Meta AI with one change: "*Shorter.*" "*Make the tone warmer.*" "*Give me 3 more options.*" "*Use a table.*" Small follow-ups usually beat a brand-new prompt.

Your Details

Fill this in once, then use it to replace the personal details in any prompt. Write on this page in the PDF, or copy it into your notes.

Replace this in the prompt	With your own
Zirlandia Milkovic	_____
@madesimple_ai	_____
Ravna Gora, Croatia	_____
AI Made Simple Europe	_____
Meta AI Complete (the e-book)	_____
$27 (price)	_____
Audience: beginners scared of tech	_____
Tone: didactic and fun	_____

Tip: paste this table into **Prompt 2** (your personal instructions) and Meta AI can apply your details to later requests in the same chat.

Five to Try First

New to Meta AI? Start with these. Each takes under a minute and shows a different strength.

1. **Prompt 1**, *Explain Llama 4 simply*: a first taste of the CTFET formula.
2. **Prompt 2**, *Set up your personal instructions*: teaches Meta AI who you are.
3. **Prompt 6**, *Plan your week*: a useful result straight away.
4. **Prompt 11**, *Photoreal entrepreneur portrait*: your first generated image.
5. **Prompt 21**, *Carousel captions*: content you can post today.

100 MISSION AND LEGACY

Create legacy: What does Zirlandia Milkovic want to leave with @madesimple_ai in 5 years? Mission, vision, values, impact, with inspiring text for about us.

About the Author

Zirlandia Milkovic teaches simple AI to beginners who are nervous about technology. She runs AI Made Simple Europe from Ravna Gora, Croatia, and shares lessons on Instagram at **@madesimple_ai**.

This collection grew out of her longer guide, *Meta AI Complete*. If it helped you, tell a friend who is still scared of AI. That is how it spreads.
